

Atelier 9 : Modification et Suppression des Articles

Contexte et objectif

Dans cet atelier, nous avons ajouté de **nouvelles fonctionnalités** à notre site e-commerce Laravel afin de gérer les produits de manière complète.

L'objectif principal est de permettre :

- l'affichage des catégories,
- l'affichage des produits par catégorie,
- la pagination,
- l'ajout d'un produit avec image,
- l'affichage des détails d'un produit.

routes/web.php

```
27  /*
28  |-----
29  | Product CRUD (Atelier 9)
30  |-----
31  */
32
33  Route::get('/products/{product}', [ProductController::class, 'show'])
34      ->name('products.show');
35
36  Route::get('/products/{product}/edit', [ProductController::class, 'edit'])
37      ->name('products.edit');
38
39  Route::put('/products/{product}', [ProductController::class, 'update'])
40      ->name('products.update');
41
42  Route::delete('/products/{product}', [ProductController::class, 'destroy'])
43      ->name('products.destroy');
```

app/Http/Controllers/ProductController.php

```
51     public function store(AddProductRequest $request)
52     {
53         $cloudinary = new Cloudinary([
54             'cloud' => [
55                 'cloud_name' => env('CLOUDINARY_CLOUD_NAME'),
56                 'api_key'     => env('CLOUDINARY_API_KEY'),
57                 'api_secret'  => env('CLOUDINARY_API_SECRET'),
58             ],
59         ]);
60
61         $uploadResult = $cloudinary->uploadApi()->upload(
62             $request->file('image')->getRealPath(),
