routes/web.php

The screenshot shows a code editor with the file "routes/web.php" open. The file contains PHP code for defining routes. The code is as follows:

```
routes > web.php > ...
119
120 Route::get('/{lang}', function ($lang) {
121     App::setLocale($lang);
122     return view('home');
123 });
124
125
126
```

home.blade.php

```
home.blade.php X home.php ...\\en home.php ...\\fr home.php ...\\ar ...
resources > views > home.blade.php > ...
1 @extends('layout.master')
2
3 @section('title', __('home.title'))
4
5 @section('content')
6 <section class="hero fade-in-up">
7     <h1 class="hero-title">
8         {{ __('home.title') }}
9     </h1>
10
11     <p class="hero-subtitle">
12         <span>MSONE</span>
13         {{ __('home.subtitle') }}
14     </p>
15
16     <div class="hero-actions">
17         <a href="/electronics" class="hero-btn primary">
18             {{ __('home.browse') }}
19         </a>
20
21         <a href="/about" class="hero-btn">
